

Customisable Data Entry & Reporting System

SIMS

WHO USES SIMS:

- ✓ Mine Planning Engineers
- ✓ Mine Supervisors

SIMS

SIMS is a customisable centralised data entry and reporting system designed specifically for mining operations, moulding itself to fit specific company needs. SIMS has powerful query abilities to view and analyse data with easy to read tables and graphical reports.

KEY BENEFITS

- ✓ **Centralise** all your mine production data into one easy-to-use interface and database.
- ✓ Make informed decisions with accurate and easy to **produce real time reports**.
- ✓ Increased team efficiency with **seamless data sharing** between departments.
- ✓ **Eliminate the need of paper logs** so anyone can access the required information from any workstation.

KEY TECHNICAL FEATURES

Shifter's Log

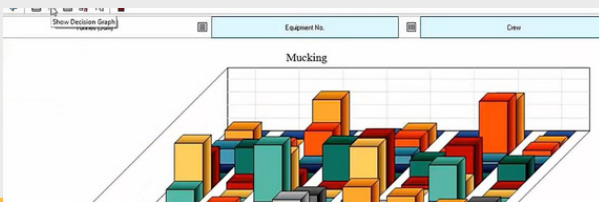

Replace cluttered paper logs and spreadsheets with a centrally located, electronic shifter's log that keeps track of all mining activities.

Crew Line-Up

Assign work tasks to all crew members quickly and efficiently - view it in a simple and easy to read table.

Production Data

Collect all production data for your mining activities in a secure database, and easily keep track of consumables.

Accounting

Capture time entry information in order to feed your payroll system and for bonus calculation purposes. SIMS is configured to fit different payroll systems so you can export all your data to systems such as SAP or JD Edwards.

Reporting & Performance Graphs

SIMS makes it easy to visualise your information based on distinct values or all values, and generates reports and easy to read graphs that can be later shared with the team or other supervisors for performance management.
