

Dedicated Open Pit Surveying Package

STUDIO SURVEY

**WHO USES STUDIO
SURVEY:**

✓ Open Pit Mine Surveyors

STUDIO SURVEY

Studio Survey is a software solution exclusively designed for the needs of Open Pit Surveyors. It is not a module inside of a complex product, but a dedicated product that simplifies and streamlines the processing of everyday survey tasks in operations mining any type of commodity.

KEY BENEFITS

-  **Save Time**
Time saving workflows and processes dedicated to Open Pit Surveyors.
-  **Dedicated Package**
Stand-alone package with all features needed for every day tasks.
-  **Ready to Print Reports**
In-built publishing & reporting tools.

KEY TECHNICAL FEATURES

Simple Drag & Drop Functionality

Having been built on the powerful Studio Core, all common data types from a wide range of software are able to be dragged and dropped into Studio Survey's 3D window without the need to go through a tedious file import process.

Intelligent CAD Tools

Experience a wide range of CAD tools that reduce time when appending and manipulating survey data.

Easy to Use DTM Tools

Easily create DTMs from point clouds and conventional strings and spot heights.

Quick Survey Data Import

Integration with a wide variety of survey instruments.

Automated Reporting Tools

A dedicated suite of reporting tools and workflows for open pit surveyors, including a Blast Volume Calculation tool, Compliance to Design and Compliance to Plan.

This all seamlessly integrates to form parts of the EOM reporting and publishing function and reduces the likelihood of manual entry errors and maintains consistence of reporting.
