ISYSTAIN

Sustainability Software Platform

iSystain Is Our Flexible Suite Of Cloud-Based Software Modules For Managing Safety, Health, Environment, Carbon, Corporate Social Responsibility And More.

With iSystain almost every aspect of running a business responsibly can be measured. Find your baseline performance, than set targets to continuously improve. We've worked hard to make our platform both easy to use and flexible enough to deal with the ever changing mandatory and voluntary legislative requirements and international standards

KEY SOLUTIONS

Compliance & Governance

Operating within a robust governance framework and structure, with the right tools, streamlines the compliance and assurance requirements of an organisation.

Health, Safety & Environment

Operating an organisation that takes care of their people, the environment, local communities and assets requires commitment and great software.

Sustainability & Impact Reporting

Reporting and disclosing the measures implemented to drive sustainability for people, planet and positive impact earns stakeholder trust, enhances an organisation's reputation, and identifies future risks and new opportunities.

Social Investment Reporting

Investing in programs that deliver positive social and environmental impact, alongside a financial return, demonstrates an organisation's commitment to the society in which it operates.

KEY BENEFITS

- ✓ Data-driven architecture, this enables high flexibility and configurability.
- ✓ Built to coexist in an ecosystem of other systems.
- ✓ Designed from the ground up to acquire information from other systems.
- ✓ Every module is designed to integrate with core tools such as workflow, action, notifications and data collection.
- ✓ Each module also contains smarts specific to the business process it is designed to drive.
- ✓ Includes a business intelligence layer which helps turn data into information.
